USE GET HELP NOW & FAQs

As a ScholarOne Abstracts Reviewer, one of your greatest help tools is ScholarOne’s Frequently Asked Questions tab on our help site, Get Help Now. Our FAQs provide immediate answers to common user questions.

In addition, Get Help Now offers downloadable guides (such as this one), video tutorials, an online user guide, and the ability to Submit a Question/Create a Case to get assistance from our Customer Support team. You can also submit suggestions on how you think we can enhance the system. We recommend that you bookmark our help site and visit often.
**USING THIS DOCUMENT**

The Review Center may be customized for each meeting’s specific needs. The role names and fields used in this document may differ from your implementation, however, the essential functions will be the same.

*Note:* For information on the **Reviewer Chair** role, please see the [Reviewer Admin Guide](#).

---

**OVERVIEW OF THE REVIEW CENTER**

ScholarOne Abstracts Review Center facilitates the management and completion of abstract review. Reviewer’s access abstracts easily and can enter scoring information online or offline.

**ACCESSING THE REVIEW CENTER**

Log in to ScholarOne Abstracts through your normal log in process.

Click the **Review** tab.

---

**REVIEW ROLE**

The Review role is used by those with submission assignments to review.

The **Abstract Reviews** page displays any submission reviews assigned to you as a reviewer. From this page, you may access the submission for review, enter a review score, and make recommendations (if applicable). You can also export your list of abstracts for review, enter scores and recommendations offline, and import your completed scoring. A completed review is indicated by a green checkmark at the left of the score sheet Control ID.
REVIEW THE SUBMISSION

To review a submission, click the associated Control ID.

**Note:** Hover over the title in the grid to see the full title in a pop-up window.

The submission proof displays for viewing and printing. You can print by clicking the Print button. Click Save then Close when finished.
If configured, you can leave comments to the author and confidential comments to the committee.
The **View/Edit** option allows to you view the comments you entered and if needed, you can edit your comments.
CHANGING YOUR VIEW

You can customize your view to display the information sorted as you specify. You can also filter the display to limit the submissions listed.

Sorting

To sort by a column, you can simply click on the column header. An arrow appears indicating that the display is sorted by this column in ascending order. Click again to change from ascending to descending order.

Alternately, you may place your mouse over any column header and click the down-arrow to display a list of sorting and configuration options. To sort by the selected column, choose either Sort Ascending or Sort Descending.
To sort by multiple columns, select **Configure Sort** from the dropdown list on the column header. Click the **Add** button to select a column then select ascending or descending order. Repeat for each column you want to sort by. You may re-order the sort options by selecting a sort and clicking the Up or Down buttons. Click the **Apply** button.
Display or Hide Columns

Place your mouse over any column header and select the down arrow. Select the Columns item to view a list of available columns. Place a check next to any column you wish to display. Uncheck any column you wish to hide.
Reorder Columns

You may re-order the columns in your view by dragging and dropping the column header. Click the column header of the column you want to move and then drag it to where you want it to display. You will see blue arrows indicating the location it will display. In the example below, the **Category** column is being moved to the right of the **Title** column.
Filter Displayed Information

You can filter the data displayed to meet your specific needs. There are two default views to choose from: **Reviews Awaiting Completion** and **Completed Reviews**. Use the dropdown menu in the **Views** selection to access each option.

You can also choose to filter by selecting one or more values from a column. Place your mouse over any column header and click the down arrow. Hover over **Filters** then check all values to include from the checklist.
To remove filters from the current view, click the **Clear Search** link in the upper right corner of the grid. This refreshes the view to include all submissions from the previous view.

![Image of filter menu]

**Note:** Use the Search feature to show only the abstracts that fit your specified criteria.

### Saving Views

When you have a view configured that you want to save, Select **Save/Edit** and give the view a name. If you wish to mark it as your default view, click **Use as Default**. If you have used filters for the view, check **Added Filters**. The view will then appear in the dropdown for you to use when you want that specific view to be applied.
SCORING

There are several ways to enter scores for your reviews. You may score online by entering the scores directly into the Abstract Reviews page. You may also enter scores offline in a spreadsheet and upload the scores. Instructions for each method are below.
Scoring Online

Your first step is to view the proof of the submission. Click on the **Control ID** to view the proof.

![Abstract Reviews](image)

When your review of the abstract proof is complete, enter a score by clicking in the **Score** column for the abstract. Select a score from the list. The contents of the list may be customized for a specific site and may differ from the example. There may be several scoring columns configured. Hover over the options for a description of each score.

![Score](image)

If configured, enter a recommendation code by clicking in the **Recommendation Code** field for the abstract. Select one or more options from the list. This is a configurable option and your score sheet may not include recommendation codes.
If applicable to your site, Conflict of Interest and Wrong Category checkboxes may be included. If you believe you have a conflict of interest in reviewing a submission, click the **Conflict of Interest** checkbox. Examples of conflicts include if you are an author on the submission, know the submitting author or are affiliated with the primary institution of the submitting author. Check the **Wrong Category** checkbox if you believe the category on the submission is incorrect and want the society to review it. Clicking Conflict of Interest or Wrong Category will prevent you from scoring the abstract (if configured this way), but the review will show as complete.

When the review is complete, a green checkmark will automatically appear in the left column.

**Scoring Offline**

There are several steps to scoring offline:

- Click on the **Import/Export** tab at the top left of the grid. Click **Import** on the dropdown.
• Download the spreadsheet template.

• Download the Resources file. The file indicates acceptable entries in the spreadsheet. This will help you enter the correct scoring information.

• Enter scores offline in the spreadsheet.

• Save the file as a .csv file and Upload the spreadsheet.

Key Points:

• Be sure to use the expected values in the Score and Recommendation fields. If the system expects a ‘3 Average ‘entry and you put a ‘3’ in the score field, the
upload will fail. You can use the **Download Resources** option on the **Import** screen to see a list of acceptable entries.

- If you intend to import your scoring data, you must save the file as a `.csv` (comma delimited) file.
- You can upload scores in batches. (Perform more than one upload).

**Resource File Example**

![Resource File Example](image)

**Scoring Template Example**

![Scoring Template Example](image)

**Export to Excel**

To export your list of reviews, begin by selecting the submissions you want to export by clicking the checkbox for one or more Control IDs. Select the checkbox at the top to
select all. If you do not select any checkboxes, all submissions will be included in the export.

Click the **Import/Export** button and select an export option. **Export to Excel (All Columns)** will export all the columns of data from the Abstract Reviews page, including those currently hidden from view. **Export to Excel (Displayed Columns)** will export only the columns shown on your display.

**Enter Scores**

In the spreadsheet containing the list of reviews, enter a score for each of your reviews and any other scoring information required by your society. When finished, save the file as a .csv (comma delimited) file.
Note: The columns in the Excel spreadsheet may display in a different order or some may not display depending on how you customized your grid.

Import Scores

You can import your updated spreadsheet by clicking the Import/Export button and choosing the Import option.

Select the Browse button and navigate to your saved .csv file. Click Import to upload your file.
You will see an **Import Report** screen indicating if the upload was successful. If successful, the number of records updated is also included for your reference. If the import failed, the report will give a reason for failure.
PRINTING

To print your list of reviews, begin by selecting the submissions you wish to print by clicking the checkbox for one or more Control IDs. If you do not select any checkboxes, all submissions will be included in the printout.

Click the **Print Selected** button. There are several printing options available to you. You can print with or without the **Scorecard**. The Scorecard displays the scoring options. You may print with or without any scores already entered. Additionally, you can choose to print to your printer or to a PDF Format.

**ABSTRACT BODY:**

**Methods:** Clinical Consequences of Reflective and Defective B- and T-Cell Functions

Cytogenetic analysis of CLLP2 used to be limited due to our inability to induce metaphases in the leukemic cells with the conventional banding techniques. However, a more accurate assessment of chromosomal abnormalities has now become the comparative genomic hybridization screening. Using the interphase fluorescence in hybridization (FISHY) technique, upon testing a large number of CLLP patients at a single institution, chromosomal aberrations were detected in 82% of cases. Lee Lindsey, John Ogbil.

**Materials:** Clinical Consequences of Reflective and Defective B- and T-Cell Functions

Deletions of chromosomal segment 13q 14 probably represent early clonal aberrations in CLLP, and strongly suggests the presence of a tumor suppressor gene whose loss or inactivation may be crucial in development of this disease. There has been considerable progress in recent years toward identification of the putative CLLP-associated tumor suppressor gene. Lee Lindsey, John Ogbil.

**Results:** Clinical Consequences of Reflective and Defective B- and T-Cell Functions

Deletions of chromosome 11 at q 23-23 are also thought to result in inactivation of a tumor suppressor gene. The International Workshop on CLLP (IWCLL) addressed the genetic issue of minimum diagnostic requirements for CLLP (which can be applied universally and not restricted only to criteria of protocol entry eligibility) and recommended a blood lymphocyte threshold of 10 by 109/L.

**Conclusions:** Clinical Consequences of Reflective and Defective B- and T-Cell Functions

In conclusion, the International Workshop on CLLP (IWCLL) addressed the genetic issue of minimum diagnostic requirements for CLLP.
ScholarOne®

ScholarOne, a Clarivate Analytics Business, provides comprehensive workflow management systems for scholarly journals, books, and conferences. Its web-based applications enable publishers to manage the submission, peer review, production, and publication processes more efficiently, increasing their profile among authors, decreasing time-to-market for critical scientific data, and lowering infrastructure costs. ScholarOne offers workflow solutions for the submission and review of manuscripts, abstracts, proceedings, books, grants & awards, and production. Supporting over 365 societies and publishers, over 3,400 books and journals, and 13 million users, ScholarOne is the industry leader.
