

# SCHOLARONE ABSTRACTS™

## v4.12 RELEASE NOTES

The following features are planned for release in ScholarOne Abstracts v4.12. This document provides information about the default configuration values and configuration time required for each of the features. If you have any questions, please contact Kasey Skidmore, Product Manager, at [Kasey.Skidmore@clarivate.com](mailto:Kasey.Skidmore@clarivate.com)

### RELEASE SUMMARY

The default configuration settings and values for each of the features available in the release are outlined below. If you wish to change any of the defaults, please contact your Client Implementation Manager or submit a case via the “Help” link on your ScholarOne Abstracts site.

FEATURE	SUMMARY
Additional Features & Improvements for the Review Center	Since the v4.11 release we have made some changes in the review center, including grid improvements and the removal of stubs for a cleaner review assignment experience.  <b>Action Required:</b> No action is required.
Speaker Management Review (Add-On)	This tool enables users to track the review of presentations uploaded by Speakers for Sessions.  <b>Action Required:</b> This feature is available as a system add-on. To activate this feature, contact your ScholarOne Relationship Manager for pricing and details.
Banning animated .gif files from upload	This measure will prevent errors in print exports.  <b>Action Required:</b> No action is required

<p>New Status Column for Submissions page under Session Proposals.</p>	<p>There will now be a configuration option to “Show submission status column on view session proposal page”</p> <p><b>Action Required:</b> This feature can be activated through configuration. This option will appear in Client Configuration &gt; General Configuration with a default value of “No”.</p>
<p>ScholarOne Ideas</p>	<p>Popular client requested enhancements; Please visit our Scholar One Abstracts Ideas site to review suggestions from other clients, and submit new input! <a href="https://scholaroneabstracts.ideas.aha.io/">https://scholaroneabstracts.ideas.aha.io/</a></p> <p><b>Action Required:</b> This feature is available for all clients; no action is required.</p>

## ADDITIONAL FEATURES FOR THE REVIEW CENTER

We have continued to bring new features into the Review Center, including the following:

- Review Center Grid Enhancements
- Removal of Stubs for Review Assignment
- Assign Reviewers Grids are now downloadable (See ScholarOne Ideas Section)
- Wrong Category / COI Report Improvements
- Required Fields Cannot be Hidden in Reviews Grid

### Review Center Grid Enhancements

There have been several changes made to the grids in the Review Center to improve the user experience. The font has been enlarged and the background lightened for more optimal viewing (see below). To help with Abstract Titles that aren't fully visible due to length, users can now hover over the cell to view a full text tooltip.

For newly copied sites, the Reviewer grid will not have any pre-saved default views, so both incomplete and completed reviews can be seen in one view by default. Additionally, the "Completed" column in the Review Abstract and Review Session Proposal grids will be moved to the left-hand **side** and include an automatically updated checkmark as the reviews are completed.

Control ID	Title	Conflict?	Wrong Cat...	Originality	Organization	Methods	Scholarship	Review Status

2646551	Partition Functions	<input type="checkbox"/>	<input type="checkbox"/>	Select..	Select..	Select..	Select..	Sel

**Removal of Stubs for Review Assignment**

Stubs have been removed from the Assign Reviewers, Assign Decisioners, and Assign Sessioners grids to make assigning more simple without the added task of filtering out stubs. When a stub is removed from a session, the status will automatically be accepted so that it can easily be put back into a session without being decided.

**Wrong Category / COI Report Improvements**

For users whose review role is configured to use Wrong Category or Conflict of Interest scoring, columns will be automatically configured to appear for these categories in the Reviewer Score Report. When displaying in the grid, the number of reviewers who have selected the Conflict of Interest or Wrong Category box on their review will display as a number in the respective column.

Both of these columns have been added to the “Export All to Excel” option in the Import/Export box. In the export, a “Yes” or “No” will appear in the columns to reflect whether or not the box was checked in the review.

**Required Fields Cannot be Hidden in Reviews Grid**

In the reviews grid, the required Scoring and Recommendation columns will no longer be able to be hidden to ensure the important information they contain is always visible. Scoring columns that are configured as not required will still be optional in the grid.

## Speaker Management Review (Add-on)

This tool enables users to track the review of details completed by hosts and/or presenters, including uploaded files or other types of details for Sessions. The host view will list all of the registered presenters along with a link to view the content that has been uploaded for their presentation. Once looked over, the host would use the drop down to indicate the material had been reviewed. See below for an example of the hostView. Additionally, when this feature is in use there will be a column in the Admin Session Center Grid with a link to view the uploaded speaker management content, and a column in both the Admin Session Center Grid and the Session Center Invitations Grid to reflect the Speaker Management Review Status.

## New Status Column for Submissions Page under Session Proposals

There will now be a configuration option in Client Configuration > General Configuration to show a submission status column to the View Submissions Page for Session Proposals. This will offer the convenience to allow users to quickly view the current state of a submission. The option in configuration will be set to “No” by default.

**View Session Proposals**

Submitted Proposals

ACTION	TITLE	ID	PARTICIPANTS	SUBMITTED	DEADLINE	TYPE	STATUS
Select ...	A Nilpotent Reduction of Scalar-tensor Inflation (3 Linked Abstracts)	247128	Annie Edison (Chair) Tim Drake (Chair)	Dec 13, 2016 8:16 AM	Dec 1, 2017 11:59 PM	Session Proposal	Under Review

## Scholar One Ideas

ScholarOne Ideas is a community-driven ideas portal that allows participants to post their product ideas, comment on the ideas of their peers, and vote to promote or demote ideas. This tool offers clients a direct, transparent, and interactive line into the development process for the product. With the release of v4.12, users will see another great enhancement to the product based entirely on your top Ideas.

### Assign Reviewers Grids are now Downloadable

The option to “Export to Excel” will now be available in the Assign Reviewers, Assign Decisioners, and Assign Sessioners grids on both the People and Abstracts sides. This option will also appear in the Session Proposal section within the Assign Reviewer and Assign Sessioner grids.

**Reviewer Assignment and Session Builder Grids now have General Filter**

A general filter is now available on the People and Abstracts sides of the Assign Reviewers, Assign Decisioner, Assign Sessioner, Assigning by Category, and Assign by Topic grids. It will also be added to the Session Proposals Assign Reviewer and Assign Sessioner grids. This general filter will enhance the usability of the grids over being limited to only column filters by broadening the variety of searches that can be run.

**New Admin Center Email Templates now Grouped by Type**

In the New Admin Center > Email Administration > Search Email section, the drop-down for E-mail Templates will now be organized into groups. The groups will be distinguished by a header describing their type, such as System E-mails, Custom E-mails, etc. This new system of organization should make it easier for users to find what they are looking for.

**Date & Time Column added to Email Search**

There will now be a column in the Admin Center Email Search that displays the date and time that the email was sent. Users will also be able to sort on this field, making it easier to find emails that were sent in a particular timeframe. (See Below Screenshot)

**Option to Output New Admin Center Email Search Results to .csv File**

In the New Admin Center Email Search, there will now be an option to output the search results to a .csv file. This can make for easier manipulating in Excel for larger data sets. (See Below Screenshot)
